

SA and NSW joint event - Stronger Together: Inclusive research with people with intellectual disability

This is a Hybrid Event, which means that some people will be online and some people will be in the room at the venue.

People with intellectual disability are working as researchers in more and more research projects. Doing research together means that we need to work inclusively so everyone is part of the research team. This changes research in some important ways.

- It helps us to focus on things that are important to people's lives
- It means we are talking with people with intellectual disability, not about them
- It makes research more accessible to people who like information in easy read or video

First there will be a presentation online. It will be a webinar linking SA and NSW. We will watch it online together at the venue.

The presentation is called: Everyday steps for working well together: inclusive research practice in a large research project

Thursday, 11 July 2024

5pm - 7pm (ACST) / 5.30pm - 7.30pm (AEST)

Cost:

People with intellectual disability FREE*

Students \$5

ASID Members \$10

Non-ASID Members \$30

(refreshments provided)

- Flinders University Festival Plaza, City Campus, Room 1426AB, Level 14, Meet on the Ground Level Foyer to be Shown to the Room
- Quest Whyalla, Conference Room 4 Moran Street, Whyalla (contact Cyanne Westerman, ovsa.eyre@gmail.com)

Presenters: Sally Robinson, Rachel High, Ruby Nankivell (Flinders Uni)

**people with intellectual disability can get a taxi voucher to get to and from the event in Adelaide*

In New South Wales

Venue: UNSW, John Goodsell Building, Level 1, Room 102

Presenters: Karen Fisher (UNSW Sydney), Sam Frain, Hannah Ogden, Tyra Buteux (Northcott)

In this presentation, the team will talk about how they work in a large research project as inclusive researchers. They will talk about why their research needs people with intellectual disability involved as co-researchers to succeed. The team will talk about how they help each other to learn well, their different jobs in the research, work they have done to build their team, and their plans for their project.

After the presentation, the groups will split up in their own states and areas. In our groups, we will talk about our ideas. We will talk about how inclusive research can help in our everyday work.
